

RMSI Becomes an Esri Utility Network Management Specialty Partner

Published February 1, 2019

San Ramon, CA, Feb 1st, 2019: RMSI, a global geospatial technology provider is pleased to announce that it's been recognized into the Esri Utility Network Management Specialty under the Esri Business Partner Program. This recognition endorses RMSI's expertise and knowledge in implementing the ArcGIS Utility Network Management Extension, and in helping utilities smoothly transition to the Utility Network.

Utility Network Management
Specialty

RMSI is amongst the first few companies to be certified as an 'Esri Utility Network Specialty Partner.' RMSI has developed a unique solution - Utility Network Digital Transformation (UNDT™) for migrating data and business processes from the Geometric Network model to the New Utility Network Model.

UNDT™ is a multistep solution that uses smart tools and frameworks for all stages of the migration process – from data readiness assessment, data remediation and enhancement, migration, to synchronization of systems between the Geometric Network and the Utility Network.

We value our relationship with Esri and are delighted to make it to this prestigious list. This comes from our high focus on developing solutions leveraging the ArcGIS Utility Network Management Extension. We've been supporting this program since its beta version and are committed to helping the utility industry maximize benefits of their investments in this technology" said, **Anup Jindal, CEO, RMSI.**

About RMSI - Maximizing Business Value

RMSI is a global IT company providing geospatial and software solutions to clients in sectors ranging from utilities, communications, natural resources, land & infrastructure, navigation & location based services, and government & funding agencies.
