Top Talks to Look Forward to At The Rising 2021

18/05/2021

→ Rising 2021 is a two-day virtual conference scheduled to be held on 21 & 22 May 2021.

It's that time of the year again for the much awaited Rising event. Now in its third year, Rising is organised by Analytics India Magazine and celebrates women in data science, IT, industry and academia. Rising 2021 is a two-day virtual conference scheduled to be held on 21 & 22 May 2021. The conference will provide a platform to meet and support women developers and professionals in the field of data science. Leading women visionaries in the fields of AI and ML will be taking the audience on an insightful journey in this 2-day long event. Rising 2021 has a strong line up of speakers. Here are a few sessions that you should not miss:

1| AI in Agriculture

When: 21 May, 12:35 – 13:05

By: Roli Jindal, Co-Founder, RMSI Cropalytics

With more than 70% of the rural population depending solely on agriculture, falling average landholding size and minimal access to modern technology – the sector is facing a stressful situation. AI can be the way forward from prediction of weather to amount of inputs, identifying crop disease on time and many other valuable insights can ensure a shift in momentum for the sector. Roli Jindal of Cropalytics will be speaking about the same at Rising. Roli is the Co-Founder at RMSI Cropalytics and she is going to speak on how AI can be used in agriculture to minimise agrarian distress. RMSI Cropalytics specialises in crop yield measurement with AI/ML, remote sensing, advanced agri-modeling, and meteorological domain expertise. The experts have programmed machines to analyse satellite imagery, classify crops, and forecast crop yields in every visible farm.
